

# Publications of Péter Gács

- [1] Peter Gács. Packing of convex sets in the plane with a large number of neighbors. *Acta Mathematica Hungarica*, 23:383–388, 1972.
- [2] Peter Gács and János Körner. Common information is far less than mutual information. *Problems of Control and Inf. Th.*, 2:149–162, 1973.
- [3] Peter Gács. Hausdorff-dimension and probability distributions. *Periodica Math. Hung.*, 3:59–71, 1973.
- [4] Peter Gács. On the concept of randomness. *Magyar Tudomány*, 18(3):152–159, 1973. In Hungarian.
- [5] Peter Gács. On the symmetry of algorithmic information. *Doklady Akademii Nauk SSSR*, 218(6):1265–1267, 1974. In Russian.
- [6] Peter Gács. On the symmetry of algorithmic information. *Soviet Math. Dokl.*, 15:1477–1780, 1974. Translation of the Russian version.
- [7] Peter Gács. On problems solvable by exhaustive search. *Sigma*, 7(1-2):89–110, 1974. In Hungarian.
- [8] Peter Gács and Domokos Szász. On a problem of Cox concerning point processes in  $\mathbf{R}^k$  of “controlled variability”. *Annals of Probability*, 3(4):596–607, 1975.
- [9] Rudolph Ahlswede, Peter Gács, and János Körner. Bounds on conditional probabilities with applications in multi-user communication. *Z. Wahrsch. Th.*, 34:157–177, 1976.
- [10] Rudolph Ahlswede and Peter Gács. Spreading of sets in product spaces and hypercontraction of the Markov-operator. *Annals of Probability*, 4:925–939, 1976.
- [11] Peter Gács and László Lovász. Some remarks on generalized spectra. *Z. Math. Log. Grdl. M.*, 23(6):547–554, 1977.
- [12] Peter Gács and László Lovász. *Algorithms*. Műszaki Könyvkiado, Budapest, 1978. In Hungarian.
- [13] Peter Gács, Georgii L. Kurdyumov, and Leonid A. Levin. One-dimensional uniform arrays that wash out finite islands. *Probl. Peredachi Inf.*, 14(3):92–96, 1978. In Russian.
- [14] Peter Gács, Georgii L. Kurdyumov, and Leonid A. Levin. One-dimensional homogeneous media dissolving finite islands. *Problems of Inf. Transm.*, 14(3):223–226, 1978. Translation of the Russian version.

- [15] Peter Gács. *Complexity and Randomness*. PhD thesis, J.W. Goethe University, Frankfurt, W.Germany, 1978. In German.
- [16] Peter Gács. Exact expressions for some randomness tests. *Z. Math. Log. Grdl. M.*, 26:385–394, 1980. There is an earlier, shorter conference version.
- [17] Peter Gács and László Lovász. Khachian’s algorithm for linear programming. *Mathematical Programming Study*, 14:61–68, 1981.
- [18] Peter Gács and Leonid A. Levin. Causal nets or what is a deterministic computation. Technical report, Stanford University, 1980. Preliminary version of the Information and Control paper with the same title.
- [19] Peter Gács and Leonid A. Levin. Causal nets. *Information and Control*, 51(1):1–19, 1981. Short version: Intern. J. Theor. Physics.
- [20] Peter Gács and Leonid A. Levin. Causal nets. *Intern. J. Theor. Physics*, 21(3-4):6–7, 1982. Short version of the Information and Control paper with the same title.
- [21] Peter Gács. Partitioning a directed graph into two acyclic subgraphs is NP-complete. Technical report, University of Rochester, Rochester, NY., 1981. Mentioned by D.S.Jonhson in the Journal of Algorithms (*NP-completeness* column).
- [22] Peter Gács. On the relation between descriptive complexity and algorithmic probability. *Theoretical Computer Science*, 22:71–93, 1983. Short version: Proc. 22nd IEEE FOCS (1981) 296-303.
- [23] Peter Gács. Randomness and probability–complexity of description. In Samuel Kotz and Norman L. Johnson, editors, *Encyclopedia of Statistical Sciences, Vol. 7*, pages 551–556. Wiley, New York, 1986.
- [24] Peter Gács. Reliable computation with cellular automata. *Journal of Computer System Science*, 32(1):15–78, February 1986. Conference version at STOC’ 83.
- [25] Peter Gács. Every sequence is Turing-reducible to a random one. *Information and Control*, 70(2-3):186–192, 1986.
- [26] Peter Gács and John Reif. A simple three-dimensional real-time reliable cellular array. *Journal of Computer and System Sciences*, 36(2):125–147, April 1988. Short version in STOC ’85.
- [27] Peter Gács. Lecture notes on descriptive complexity and randomness. Technical report, Boston University, Computer Science Dept., Boston, MA 02215, 2009. [www.cs.bu.edu/faculty/gacs/papers/ait-notes.pdf](http://www.cs.bu.edu/faculty/gacs/papers/ait-notes.pdf).
- [28] Peter Gács. Self-correcting two-dimensional arrays. In Silvio Micali, editor, *Randomness in Computation*, volume 5 of *Advances in Computing Research (a scientific annual)*, pages 223–326. JAI Press, Greenwich, Conn., 1989.
- [29] Peter Gács. Review of Gregory J. Chaitin: Algorithmic Information Theory. *Journal of Symbolic Logic*, 54(2):624–627, 1989.

- [30] Thomas M. Cover, Peter Gács, and Robert M. Gray. Kolmogorov’s contributions to information theory and algorithmic complexity. *The Annals of Probability*, 17(3):840–865, 1989.
- [31] Peter Gács. A Toom rule that increases the thickness of sets. *Journal of Statistical Physics*, 59(1/2):171–193, 1990.
- [32] Peter Gács, Pablo Tamayo, and Weiguo Wang. A fast hardware random number generator using Wolfram’s cellular automaton rule with interface to the CAM-6 machine. Technical report, Boston University, TR 91-007, Department of Computer Science, Boston, MA 02215, 1991. Work done in 1988.
- [33] Aditi Dhagat, Peter Gács, and Peter Winkler. On playing “twenty questions” with a liar. In *Proceedings of the third annual ACM-SIAM symposium on Discrete algorithms, SODA ’92*, pages 16–22, Philadelphia, PA, USA, 1992. Society for Industrial and Applied Mathematics. Full version: <http://www.cs.bu.edu/faculty/gacs/papers/liars.pdf>.
- [34] Peter Gács. Fault-tolerant and self-organizing cellular automata. In R. Kotecky, editor, *Phase Transitions: Mathematics, Physics, Biology . . . : proceedings of the Workshop held in Prague, June 1-5, 1992*, pages 97–107, Singapore, 1993. World Scientific, Singapore.
- [35] Peter Gács and Anna Gál. Lower bounds for the complexity of reliable boolean circuits with noisy gates. *IEEE Transactions on Information Theory*, 40:579–583, 1994.
- [36] Peter Gács. The Boltzmann entropy and randomness tests. In *Proceedings of the Workshop on Physics and Computation*, pages 209–216. IEEE Computer Society Press, 1994. Full version: <http://www.cs.bu.edu/faculty/gacs/papers/ent-paper.pdf>.
- [37] Peter Gács. Deterministic computations whose history is independent of the order of updating. *ArXiv e-prints*, 1995, 1204.2931. also [www.cs.bu.edu/faculty/gacs/papers/commut.pdf](http://www.cs.bu.edu/faculty/gacs/papers/commut.pdf).
- [38] Peter Gács and Kihong Park. Information loss in simple one-dimensional cellular automata. Technical report, Boston University, Department of Computer Science, Boston, MA 02215, 1996.
- [39] Charles H. Bennett, Peter Gács, Ming Li, Paul M. B. Vitányi, and Wojciech Zurek. Information distance. *IEEE Transactions on Information Theory*, 44(4):1407–1423, 1998. Preliminary version appeared in STOC’ 97, arXiv:1006.3520.
- [40] Peter Gács. A new version of Toom’s proof. Technical report, Department of Computer Science, Boston University, TR 95-009, Boston, MA 02215, 1995. [www.cs.bu.edu/faculty/gacs/papers/toom-proof.pdf](http://www.cs.bu.edu/faculty/gacs/papers/toom-proof.pdf).
- [41] Peter Gács. Reliable cellular automata with self-organization. *Journal of Statistical Physics*, 103(1/2):45–267, April 2001. See also arXiv:math/0003117 [math.PR] and the proceedings of STOC ’97.
- [42] Peter Gács. The clairvoyant demon has a hard task. *Combinatorics, Probability and Computing*, 9:421–424, 2000. arXiv:math/0302059 [math.PR].

- [43] Peter Gács, John Tromp, and Paul M. B. Vitányi. Algorithmic statistics. *IEEE Transactions on Information Theory*, 47:2443–2463, 2001. arXiv:math/0006233 [math.PR]. Short version with similar title in Algorithmic Learning Theory, LNCS 1968/2000.
- [44] Peter Gács. Quantum algorithmic entropy. *J. Phys. A: Math. Gen.*, 34:6859–6880, 2001. See also arXiv:quant-ph/0011046.
- [45] Peter Gács. Compatible sequences and a slow Winkler percolation. *Combinatorics, Probability and Computing*, 13(06):815–856, november 2004. arXiv:math/0011008 [math.PR]. Extended abstract: STOC '01.
- [46] Peter Gács. Clairvoyant scheduling of random walks. *Random Structures and Algorithms*, 39(4):413–485, 2011. arXiv/math:0109152 [math.PR], [www.cs.bu.edu/faculty/gacs/papers/walks.pdf](http://www.cs.bu.edu/faculty/gacs/papers/walks.pdf). Short version in STOC '02.
- [47] Peter Gács. Reliable computation (chapter). In Antal Iványi, editor, *Algorithms in Informatics*, volume 2. ELTE Eötvös Kiadó, Budapest, 2005. ISBN: 9634637752. Hungarian printed version. Electronic version also in English: [www.cs.bu.edu/faculty/gacs/papers/iv-eng.pdf](http://www.cs.bu.edu/faculty/gacs/papers/iv-eng.pdf).
- [48] Peter Gács. Uniform test of algorithmic randomness over a general space. *Theoretical Computer Science*, 341(1-3):91–137, 2005.
- [49] Peter Gács. The angel wins. *ArXiv e-prints*, 2006, 0706.2817.
- [50] Peter Gács, Mathieu Hoyrup, and Cristóbal Rojas. Randomness on computable probability spaces - a dynamical point of view. *Theory of Computing Systems*, 48:465–485, 2011. 10.1007/s00224-010-9263-x, arXiv:0902.1939. Appeared also in STACS 2009.
- [51] Peter Gács. Constructive versions of some theorems in probability theory. Technical report, Boston University, Department of Computer Science, Boston, MA 02215, 2009. [www.cs.bu.edu/faculty/gacs/papers/constr-prob.pdf](http://www.cs.bu.edu/faculty/gacs/papers/constr-prob.pdf). Session on Logic and Analysis at the Joint Mathematics Meeting, New Orleans, January 2010.
